Hi Damien,

I failed to mention in the justification for the IWC that the conference will include an educational session pertaining to the new Steam Electric Effluent Guidelines. Also, I found out that the Education Workshops they are offering, including the one I mentioned that is presented by Aquatech, will cost an extra \$250! So, I'm not entirely sure that it would be worth the \$ but maybe we can discuss. I realize that all this is providing that I am even able to attend. Please let me know if there is anything else I need to do at this point.

Thanks.
